

Semester 1 Exam Preparation

This program will deliver a comprehensive exam preparation program aimed at preparing year 11 and 12 students for their first semester exams early in Term 2. These classes will focus on specific exam questions and explain in detail how the syllabus content can be employed to construct successful examination responses. These classes offer students a structured revision program that will add value to the independent study they are doing at home.

Program includes:

Subject Revision: The foundation of the program focusses on re-teaching and revising the specific syllabus areas that will be assessed in the first semester exams.

Exam Preparation: The classes focus on the revision of topics followed by a discussion on how this material is assessed in exam style questions. There is sufficient time within the eight hours for teachers to model how to answer exam questions successfully as well as time for students to independently practice constructing their own answers. All the teachers involved in this program have significant marking experience and know what needs to be addressed to ensure students meet with success in exams.

Structure

This program will be conducted on the Mindarie Senior College campus on Saturdays and Sundays, and commences the weekend of the 29 and 30 of April and runs for a total of four consecutive weeks. It consists of a total of 8 hours of teaching per subject broken up into 2 hours per session for the four weeks.

A Successful Program

Students attending exam preparation programs report that they feel more confident tackling assignments and are better prepared to sit their exams.

F.A.Q.

How can students be assured that what they have learnt in semester one will be addressed in this program?

The answer to this important question is really quite simple.

- ✓ MMA liaises with your subject teachers to find out exactly what topics will be included in the first semester exams and this knowledge is relayed to our teachers so that they can design a fully inclusive program.
- ✓ Before the classes begin MMA sends out a questionnaire to all students participating in the program to find out exactly what topics and texts you have been studying and this information is forwarded to MMA's teachers for inclusion in their programs.
- ✓ This questionnaire also asks families to alert us of any specific weaknesses in the student's knowledge that may have been identified by the school or the student so that this specific area can be re-taught by the MMA teacher.
